# Commentary

## Employment

The Australian and State *trend series* comparisons, shown on page iv, indicate that there was an increase of 2.3 per cent in Tasmania's employment over the year to January 1994. The other Australian States also showed a *trend series* increase in employment over this twelve months' period. The largest percentage increase in employment was in Western Australia (where employment increased 4.5 per cent). The next highest increase in employment was in Queensland (3.5 per cent), followed by NSW (2.9 per cent), Victoria (1.0 per cent) and South Australia (0.8 per cent).

Compared with January 1993, regional estimates of *unadjusted* employment in January 1994 showed an increase of 3200 for the Northern Statistical Division. Employment also increased in the Hobart and Southern Statistical Division by 1800 over the same 12 months. Employment in the Mersey-Lyell Statistical Division decreased 1700.

(See tables 3–8, pages 2–7.)

## Unemployment

The Tasmanian *trend series* estimate of 26 500 unemployed persons in January 1994 was a decrease of 400 on the figure for January 1993 of 26 100. The *trend series* estimate of the unemployment rate of 11.9 per cent in January 1994 was a decrease in the *trend series* estimate of the unemployment rate of 12.3 per cent in January 1993.

(See tables 3–8, pages 2–7.)

## The Labour Force

In January 1994 the *unadjusted* estimate of civilian Tasmanians aged 15 or more was 363 500. The estimate of persons in the labour force (*trend series*) was 219 900. The *trend series* estimate of the labour force participation rate in January 1994 was 60.5 per cent, which was greater than the figure of 59.9 per cent in January 1993.

For males, the *trend series* estimate of participation rate was 71.9 per cent, the same as for January 1993. For females, the *trend series* participation rate was 49.5 per cent (higher than the 48.2 per cent in January 1993).

(See table 3, page 2.)

## Employed Wage and Salary Earners

In May 1993 there were approximately 154 900 employed wage and salary earners in Tasmania. This compares with approximately 146 700 in May 1991.

In May 1993 the Tasmanian public sector accounted for 31.5 per cent of all employed wage and salary earners. In the Tasmanian economy, the category Community services had the highest industry representation, 27.2 per cent, up from the equivalent figure of 26.9 per cent recorded in May 1991. The next highest industry grouping Wholesale trade and Retail trade (21.9 per cent, up from 18.7 per cent in May 1991) and Manufacturing (14.0 per cent, down from 15.9 per cent in May 1991).

The category Recreation, personal and other services was up from 7.9 per cent in May 1991 to 8.7 per cent in May 1993.

In May 1993, women made up 45.8 per cent of all employed wage and salary earners. In May 1991, the equivalent figure was 44.1 per cent.

(See table 9, page 8.)

## Award Rates of Pay Indexes

For the 12 months ended December 1993 weekly award rates of pay indexes for Tasmania rose by 0.4 per cent for full-time adult females and by 1.6 per cent for full-time adult males. For Australia, the figures were 0.9 per cent for females and 0.9 per cent for males.

For full-time adult female employees in Tasmania, the largest industry increases over this 12 month period occurred in Public administration and defence (2.1 per cent), and Recreation, personal and other services (1.8 per cent).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in Public administration and defence (11.5), and Recreation, personal and other services (1.3 per cent).

The largest occupation increases over the period for full-time adult female employees occurred in Plant and machine operators, and drivers (1.7 per cent), and Labourers and related workers (0.8 per cent).

For full-time adult male employees the largest occupation increases over the period occurred in Labourers and related workers (3.3 per cent), and Plant and machine operators, and drivers (2.3 per cent).

(See table 14, page 10.)

## Housing Finance

During December 1993 there were 1397 new secured housing finance commitments, valued at \$78.1 million, entered into in Tasmania. This represented a 16.6 per cent increase on the number (1198) and a 21.5 per cent increase on the value (\$64.3 million) for November 1993.

Of the total housing finance of \$82.5 million (including \$4.4 million for alterations and additions) banks lent \$78.2 million, or 94.8 per cent.

*Housing Finance for Owner Occupation, ABS catalogue number 5609.0, released on 17 February 1994, \$11.00.*

## Building Material Prices

The 12 months ending December 1993 saw an increase of 2.3 per cent in the cost of house building materials in Hobart.

This was the second lowest of all capital cities except Perth, with 1.8 per cent, and was considerably lower than the 5.4 per cent recorded by the weighted average of all six capital cities. Adelaide recorded the highest increase of 12.1 per cent for the 12 month period.

The movement in prices for materials used in building other than house building was considerably less dramatic. Again, Adelaide topped the annual movement at 3.2 per cent. Hobart recorded 2.2 per cent for the same period.

Major contributors to the annual movement in Hobart were, structural timber (up 6.1 per cent), ready mixed concrete (up 5.9 per cent), fabricated steel products (up 5.5 per cent), aluminium windows (up 4.8 per cent) and structural steel (up 4.7 per cent).

(See table 18, pages 13–14.)

*Price Index of Materials Used in House Building, Six State Capital Cities and Canberra, ABS catalogue number 6408.0, released on 15 February 1994, \$8.50.*

*Price Index of Materials Used in Building Other than House Building, Six State Capital Cities and Canberra, February 1994, ABS catalogue number 6407.0, released on 15 February 1994, \$11.00.*

## Building Approvals

There were 371 new dwelling units approved during December 1993 in Tasmania, a decrease of 10 per cent on the number recorded for November 1993 (410), but a five per cent increase on the December 1992 figure of 355.

For the twelve months ended December 1993 there were 4123 new dwelling units approved, one per cent lower than the figure recorded for the previous corresponding twelve months (4154).

The latest monthly trend estimates available for the number of dwelling units approved show a levelling off over the last six months.

The value of new residential buildings approved, at current prices, for December 1993 was \$26.7 million, compared with \$33.4 million in November 1993 and \$24.7 million in December 1992.

The value of all buildings approved, at current prices, for December 1993 was \$40.6 million compared with \$66.4 million in November 1993 and \$36.8 million in December 1992.

*(See table 27, page 19.)*

## Retail

The strong growth, evident in the August and September 1993 trend estimates for turnover of retail and service establishments, has weakened falling to 0.5 per cent in November and 0.2 per cent in December. The trend estimate for December 1993, for Tasmania, was \$214.9 million, slightly up on the estimate for November 1993 and more than three per cent higher than the estimate for December 1992.

The estimate of turnover for December 1993, for Australia, was nearly five per cent higher than for December 1992. All states, except Victoria, are showing growth in the monthly trend estimates.

In original terms, the estimate of retail turnover in December 1993, for Tasmania, was \$287.2 million, an increase of nearly four per cent on the figure for December 1992.

*(See table 35, page 23.)*

## New Motor Vehicle Registrations

There were 1 333 new motor vehicles (excluding motor bikes) registered in Tasmania during December 1993. This over eight per cent more than for November (1 233), but an 18 per cent decrease on the number registered for December 1992. There were 448 rental vehicles registered for the month.

Registrations for the twelve months ended December 1993 were half a per cent higher than for the twelve months ended December 1992.

*(See table 34, page 23.)*

(a) Further information on construction of CPI indexes is contained in the bulletin *The Australian Consumer Price Index Concepts, Sources and Methods* (Catalogue No. 6461.0) (b) The CPI is now published on a reference base of 1989-90 = 100.0. (c) Series from and including March 1989 has been affected by the change in treatment of mortgage interest charges.

December	n.y.a.	14.9	16.0	108.6	32.1	5.1	703	3 449

(a) Source: Australian Dairy Corporation. (b) Bottled and canned. (c) Changing productivity per staff-hour makes these indicators unsatisfactory for long-term comparisons. (d) For sale as such; excludes production for use within the same enterprise. (e) Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979-80 Manufacturing Census. For multi-product establishments, value added was apportioned to products on the basis of gross receipts from each product. (f) Includes the whole milk equivalent of farm cream intake. (g) Includes butter equivalent of butter oil. (h) Includes spinning, weaving and carpetmaking. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant. (i) Production low due to annual close-down.

November	271	162	3 233	3 560
December	266	162	3 294	3 596

(a) Due to changes to the *Banking Act 1959* in December 1989, which removed the distinction between trading and savings banks, figures previously published in this table are no longer comparable with those shown above. (b) Details are the averages of weekly figures for each month. The figures are derived from returns submitted by banks authorised under the *Banking Act* together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank. (c) Excludes non-resident loans. (d) Affected by reclassification of certain accounts.

December	74 056	391	15 348	89 795	72 362		

(a) The following persons are not included in these statistics: passengers under three years of age accompanied by an adult; passengers travelling on chartered flights with minor carriers; passengers travelling on private or VIP flights; and passengers from or departing for overseas other than direct flights to New Zealand. (b) The proportion of departing passengers who were visitors was shown to be about 58 per cent in the 1981 Tasmanian Visitor Survey, 55 per cent in the 1984 Tasmanian Visitor Survey, about 53 per cent in the 1986 Tasmanian Visitor Survey and almost 65 per cent in the 1990 Tasmanian Visitor Survey and about 57 per cent in the 1992 Tasmanian Visitor Survey.

Table 32. Total passenger arrivals  
by air and sea into Tasmania

Period	Original	Seasonally		Trend
		adjusted (a)	(b)	
1992				
December	82 262		66 428	66 156
1993 ---				
October	65 761		64 403	68 783
November	68 546		75 792	70 087
December	89 795		71 645	71 332

(a) Prior adjustments for the changing dates of Easter have been made.  
 (b) There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time series of seasonally adjusted and trend series from January 1971 is available on request telephone (002) 20 5870.

## Symbols and other usages

The following standard symbols are used in publications of the Tasmanian Office of the Bureau:

ASIC	Australian Standard Industrial Classification	r	figure or series revised since previous issue
M	males	s	subject to sampling variability too high for most practical purposes
F	females	..	not applicable
P	persons	—	nil or rounded to zero
n.a.	not available	—	break in continuity of series (where a line is drawn between two consecutive figures in the same column, or alongside two or more figures in consecutive columns)
n.e.c.	not elsewhere classified		
n.e.i.	not elsewhere included		
n.p.	not available for separate publication, but included in totals where applicable		
n.y.a.	not yet available	(M)	Municipality
p	preliminary — figure or series subject to revision	(C)	City

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Values are shown in Australian currency.
